REASON FOR ALLOWANCE

1. Claims 1-30 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As prior art U.S. Patent Number 5,291,485 teaches a reformatter for reformatting digital data signals transported in frames having payload bytes divided into groups that are subdivided into virtual tributaries (VTs) having a number of bytes selected according to a synchronous optical network (SONET) standard specifying sizes of VTs according to number of bytes.

Prior art fails to teach as recited in independent Claims 1, 10, 19, and 22, upon receiving a multiplex order of concatenated payload in M communication signals, dividing the M communication signal by three to determine a number Y and determining the control of the M communication signal by, designating a first signal of M communication signals as a control signal and designating a second signal through a Yth signal of the M communication signal as being controlled by the immediately preceding signal thereto and designating each Y+1th signal of the M signals through the Mth communication signal as being controlled by a signal Y positions prior thereto.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2663
